

# A STATE OF SOME INDICES OF OXIDATIVE-ANTIOXIDATIVE SYSTEM IN TUBERCULOSIS PATIENTS WITH COMPLICATIONS OF CHEMOTHERAPY

*Yu. V. Prosvetov*

## *Summary*

There were examined 197 patients with different forms of pulmonary tuberculosis who had adverse reactions on antituberculosis medications; 120 patients who tolerated chemotherapy well and 28 apparently healthy people. In patients with adverse drug reactions a substantial changes in oxidative-antioxidative system were detected: the alteration of lipids metabolism and accumulation of lipid peroxidation products.
