

THE EPIDEMIOLOGICAL SITUATION OF TUBERCULOSIS IN CHILDREN AND TUBERCULOSIS CONTROL INDICES IN UKRAINE IN 2010

O. I. Belogortseva, Yu. I. Feshchenko

Summary

Main epidemiological indices of tuberculosis in children 0-14 years of age and teenagers (15-17 years) in Ukraine have been presented in current report. The structure of tuberculosis incidence by clinical forms and follow-up categories has been analyzed. The group of children with high risk for tuberculosis has been characterized. The recommendations for improving the quality of the tuberculosis control network have been given.
